

Sand Pro M-Series

Affordable Downdraft Sanding Stations

You can't get away from the sanding,
but you can get away from the dust.

SAND PRO

- Self-contained
- Portable
- Affordable
- Easy Filter Servicing
- Great Air Velocity
- Grid System Top

The Sand Pro M-series of downdraft sanding tables provides an economical way to get away from sanding dust by collecting it directly at the source. These machines are self-contained sanding stations that are portable, quiet, and powerful. All machines come on 5" casters that lock both ways, giving the user an easily movable machine that also makes for a solid work station. The unique grid system top allows for jigs and fixtures to be moved around to add value and versatility to the Sand Pro. The Sand Pro M-series is a highly practical solution for hand sanding applications.

Sand Pro M-Series

(Self-Contained Sanding Stations)

M6033

FYI

I) There is no need to rob valuable C.F.M. from your central vacuum system or conditioned air from your shop. Machine remains truly portable with no interference from a long vacuum hose.

II) Uses high quality 2" deep pleated filters and comes with a 1/2" netted prefilter for collecting larger particles. Change filters in 30 seconds without bending over.

III) Top is 1/4" ABS plastic with a rubberized coating providing a mar free, moisture resistant, top with good friction. It is supported by a hardwood top that is guaranteed to stay flat and warp free.

IV) All Sand Pro's ship F.O.B. Elkhart, IN 46514

Model	Length	Width	Height	CFM	HP	Price	Ship Weight
M7236	72"	36"	Choose	2800	1	\$2195.00	380
